

## 3M<sup>SM</sup> Health Care Academy

### Welcome to 3M Oral Care

Dentists demand simplified, reliable restorative and prosthodontic procedures to achieve the best results for their patients. But the gain in simplicity and reproducibility must not compromise the clinical quality and longevity of the restorations. This 3M Oral Care symposium focuses on the scientific relations and clinical experience with bulk-fill materials and the requirements to ensure proper deep light curing as well as the 15 years of clinical experience with self-adhesive resin cements.

### 3M Symposium: The science behind simplified clinical success

CED-IADR/NOF

Oral Health Research Congress, Vienna, Austria **Friday, September 22<sup>nd</sup>, 2017**

**Date: Friday, September 22<sup>nd</sup>, 2017 | Schedule: 16.00h – 18.00h | Venue: Congress Center, Room Lehar 1**

Three international speakers and experts in their fields will provide insights into the science behind the clinical success. *Chaired by Prof. Nicoleta Ilie, Munich, Germany*

**Prof. Klaus-Peter Ernst**  
Mainz, Germany

**Bulk-fill restoratives:  
What we know, what we have,  
what we need, what we prefer**

**Prof. Richard Price**  
Halifax, Canada

**The science of deep cure**

**Prof. Trevor Burke**  
Birmingham, United Kingdom

**Self-adhesive resin cements:  
15-year clinical results**
